ECA Elementary Security Procedures

- Elementary students may not leave campus without being signed out at the front office.
- Visible recognition and identification are required for entry.
- All visitors (parents, grandparents, etc.) must "sign in" and "sign out" and obtain a visitor's badge at the office. Please allow time to check in before going anywhere on campus, such as your child's class.
- Non-ECA students or friends may not visit during the school day without prior approval from the Elementary Administration.
- Students from other schools who wish to visit ECA students or teachers on campus before or after school hours must sign in at the school office and must wear a visitor's badge.
- All teachers will wear identification tags to identify themselves.
- All outside doors are locked, everyone must enter through the double glass doors by the office, sign in and pick up a visitor badge.
- The staff will be paying attention to vehicles in the parking lot and adults and older kids who are in the area.
- Any visitor that is not recognized by our office staff will be asked to show proper identification as well as state the reason for the visit.

Security Measures

- Controlled access with locked doors
- Real-time video surveillance system
- Access to Pre-Kindergarten driveway limited with arm gates and boulders
- Ring camera and doorbell on the modular building
- Emergency dead bolt locks to secure “wings” of the building
- Ground floor access to the balcony is locked however students are able to utilize it throughout the day to access other classrooms
- Volunteer parents will walk the campus at any given time during the school day to show a presence of heightened security.
- IF there was ever a need to evacuate the students, we have a plan to meet at Heart of the Springs Church, on the corner of Union and Paseo. It is 1/5 of a mile from our campus.

Drills
Drills (fire, weather, or environmental hazard) are required monthly and will be practiced throughout the school year.

LifeSpot
For a life-threatening situation (active shooter), ECA currently subscribes to the LifeSpot App and service. It enables every teacher and staff member to activate an alarm from their cell phone, anywhere on campus. The alarm immediately (w/in 6 sec) alerts all the other users on campus of a life-threatening situation. It also immediately notifies county sheriffs dispatch and all emergency agencies that are in the vicinity. The App communicates to the teachers and staff when help is on scene. When on scene emergency personnel can see (via GPS) where all the staff are located. This LifeSpot App is the best of its kind, and it provides a much quicker response than what has been achievable up to this point, in Colorado or any state.
